Flow Regulator For Belt and loss in weight touch **MC 353**

General information

PWS10020260709

MC 353 is an excellent solution for dynamic weighing, 100% customizable by the customer. In fact, the MC 353 dynamic weighing solution can work as a weight loss flow regulator or as a belt flow rate regulator, based on the needs and on the industrial weighing system. MC 353 integrates the variables of weight and speed so as to be able to measure and regulate the flow rate. MC 353 is easy to use, has a touch screen and disposes of a tolerance alarm function. During operation, it is possible to display the main status parameters and the white status LEDs with adjustable intensity. MC 353 is equipped with screw terminal blocks (5.08 mm). MC 353 allows to proceed to the weighing of the material without interrupting the work flow in a simple and efficient way.
