Technical specifications

PWS10120261114

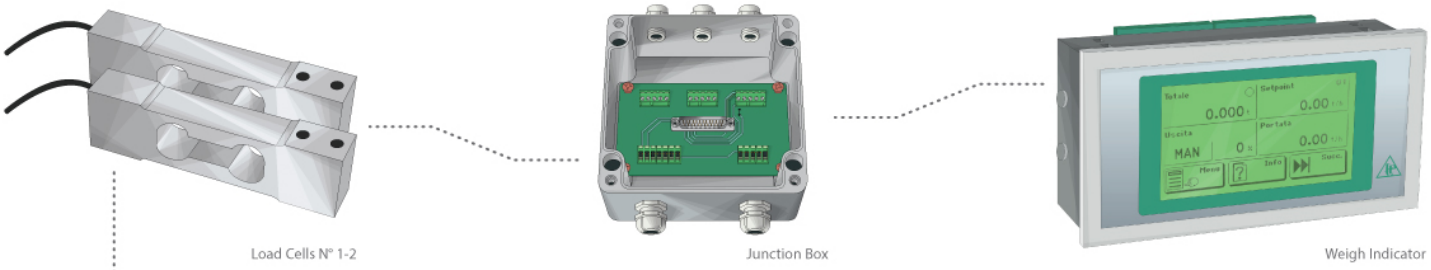

The BWS-H product is used in dynamic weighing as a dosing tape in harsh working environments such as steel mills, foundries, port sites, etc. our heavy-duty metering belts are able to measure exactly the weight that is discharged, stop when the weight corresponds to the set set and bear large loads of material. The tape can be customized according to the different needs arising from the type of product to be weighed.

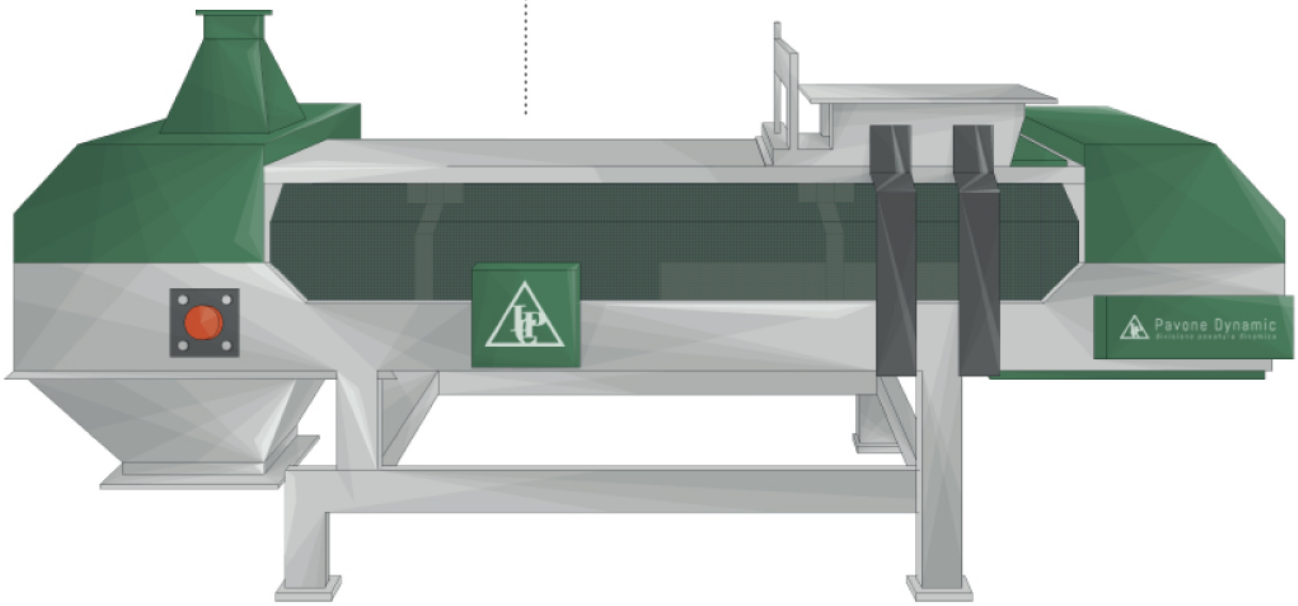

All indicated data may be changed without notice.
All the measures indicated are expressed in millimeters (mm).
