

## General information

PWS9920260530

The MC 352 product is a belt flow regulator able to integrate weight and speed variables, perform the flow regulator function set by means of the analog output PI and totalize the dosed weight with transmission of the same by impulsive output. You can view the status of the I / Os, the current weight, the instantaneous speed and the correction factor set and connect the weighing instrument to the PC / PLC using the communication protocol. The product can be customized according to customer needs.
