The BLH NOBEL KIM-1 load cell is extremely precise and robust, it is resistant to very high lateral forces, it has a moveable loading point and it is easy to install. The KIM-1 load cell is used in weighing / stocking systems (silos, bins, tanks), in mixing tanks, blending and dissoluble reactors, in force measurement systems and in conveyor belts. The KIM-1 load cell is also supplied with a shielded cable with 4 conductors and the length of 10 mt for electric connections.
