The PRR HT product, built in stainless steel, is a load cell for high temperatures. It is equipped with watertight protection for use in severe environmental conditions and can be customized on request. It has a low profile and it is suitable for hostile environments. The PRR HT cell has excellent linearity and precision characteristics, it is insensitive to side loads and withstands overloads of up to 500%. The PRR HT load cell is widely used in the iron and steel sector.
