PWS12720260709

The SB HT load cell is ideal for high temperatures and it is designed for weighing hoppers and tanks and for the construction of low-profile platforms. When used with its mounting accessories, it avoids the use of mechanical constraints. The SB HT cell has excellent characteristics of linearity, precision and resistance, even at lateral loads of over 50%. The SB HT cell is made of stainless steel and has a watertight protection for use in severe environmental conditions.
