Mounting kits **DE MOUNTING KIT**

General information

PWS27420261105

DE MOUNTING KIT, unique in its kind, represents an excellent solution for complex situations where precision and strength are required. It is ideal for weighing roller conveyors, platforms, hoppers and tanks and it is able to absorb thermal expansion, deformation and structural failure. DE MOUNTING KIT is an accessory that allows easy replacement of the cell during maintenance by using the 4 bolts installed on the top plate as a jack. Anti-tilting function is included. Stainless steel AISI 304 and stainless stell AISI 316 versions are available upon request. When used with DDR load cells with a capacity of 2÷20t, 30÷50t and 75÷100t, the DE MOUNTING KIT has to be in stainless steel or alloy steel.

Suggested related products

A highly performing weighing system must be accurate, perfectly calibrated and well maintained. In order to improve the load cell performance and to optimize its functioning, you may need the following products:

Mounting kits MKX ®

Tester 1008 TESTER 1008

Shear beam load cells 65023

Junction Box CGS4-C

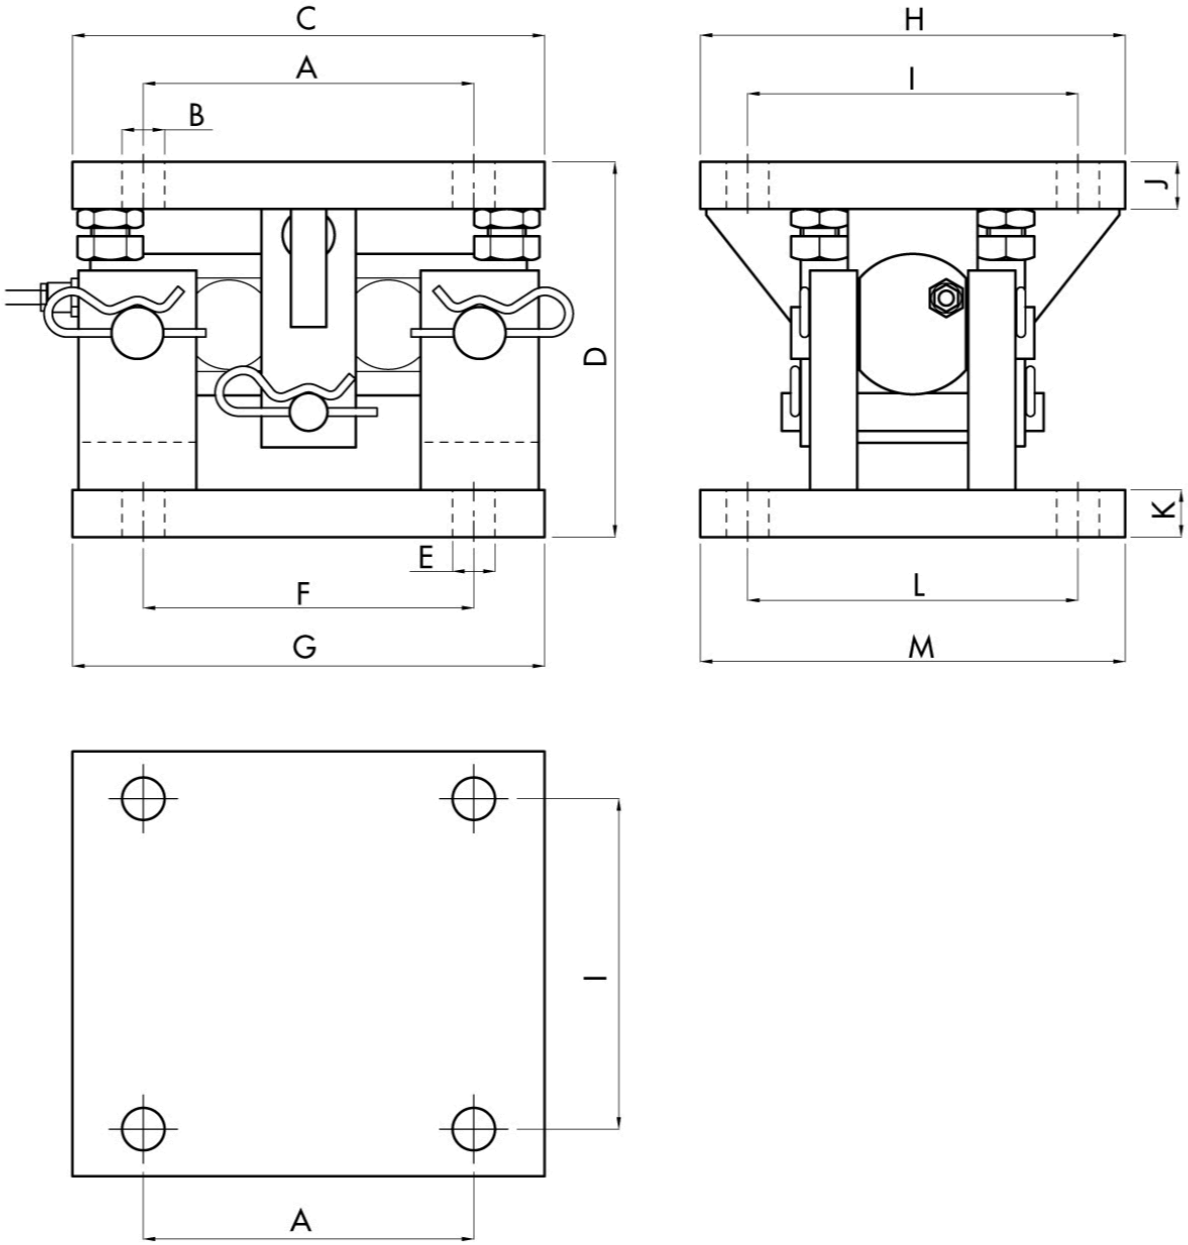

Double Shear Beam Load Cell DDR

Shear beam load cells SBR
