

General information

PWS18220260709

The off center load cell 1320, made of aluminum, is ideal for large-scale single-cell platforms, dynamometers and weight controllers. This load cell maintains precision in any position the object is loaded and this solves the problems that usually occur in weighing systems if the object does not rest exactly on the center of the cell. The off-center load cell 1320 has optional functions and can be customized according to customer needs. It has a 5-meter shielded 4-conductor cable.

Suggested related products

A highly performing weighing system must be accurate, perfectly calibrated and well maintained. In order to improve the load cell performance and to optimize its functioning, you may need the following products:

Off Center load cell [C2G1](#)

Off Center load cell [CB004](#)

Off Center load cell [CB14](#)

Off Center load cell [U2D1](#)

Technical specifications

PWS18220260709

Rated Load (RL):	1, 1.5, 2 t
Combined error:	±0.02 % RL
Repeatability:	±0.015 % RO
Creep (30 minutes):	±0.0170 % of applied load
Ultimate overload:	150 % RL
Visible resolution (in divisions):	3000
Compensated Temperature:	-10 ÷ + 40 °C
Temperature range:	-30 ÷ +70 °C
Temperature effect on zero balance:	±0.0023 % RO/°C
Temperature effect on output:	±0.0010 % of applied load/°C
Rated output RO:	±0.2 mV/V
Zero balance:	±0.2 mV/V
Insulation resistance:	>2000 MOhm
Cable Length:	5 m
Impedance:	415 ÷ 15 Ohm
Maximum excitation:	15 Vdc/ac RMS
Excitation recommended:	10 Vdc/ac RMS
Output impedance:	350 ±3 Ohm
Ultimate central overload:	300 % RL
Rated output tolerance:	±0.2 mV/V
