PWS27620260221

The off center load cell PSUP12, built in aluminum, has an excellent quality / price ratio and is ideal for any type of platform, especially for large single-cell platforms. The PSUP12 single point cell maintains precision in any position the object is loaded and this solves the problems that usually occur in weighing systems if the object does not rest exactly on the center of the cell. The cell can be customized on request.
