The off center load cell PSZTL, built in aluminum, is robust and precise and is ideal for large single-cell platforms. Its weight capacity can reach up to 2000 kg. The PSZTL single point load cell ensures precise weighing in all circumstances, even where the load is not positioned exactly in the center. The off-center cell is particularly used in the food packaging sector and for the construction of single-cell scales. The off center load cell PSZTL has a 6 meter long shielded cable with 6 wires.
