

## General information

PWS34120260210

The off center load cell 1260, made of aluminum, is robust and precise and ideal for large-scale single-cell platforms. This load cell maintains precision in any position the object is loaded and this solves the problems that usually occur in weighing systems if the object does not rest exactly on the center of the cell. The off center load cell 1260 has a 6 meter long shielded cable with 6 wires.
