PWS920250825

The CS20 S-type (tension and compression) load cell has been designed for the industrial fiscal weighing of small tanks and hoppers, it has excellent characteristics of linearity and precision and an excellent resistance to overloads of more than 300%. The CS20 cell is made of nickel-plated steel, it is weather-proof for use in severe environmental conditions and it is available in a special version for high temperature.
