The CS05 dynamometer is an industrial weighing solution designed for high capacity mobile weighing. The CS05 dynamometer can be used both in warehouses and hostile industrial environments. Due to its characteristics, the CS05 dynamometer is used especially in the steel, mechanical and food industries, where it is necessary to weigh significant suspended loads in terms of weight. The CS05 dynamometer consists of a painted steel structure and is equipped with an infrared remote control, standard approved galvanized shackles, programmable digital filter, 5-key waterproof keyboard and adjustable light intensity.

Display:	Backlit 25mm LCD				
Temperature range:	-10 ÷ 40°C				
Filter:	Programmable				
Power supply:	4 AA size battery , even rechargable, 40 houRS battery life				
Calibration:	Programmable by keyboard or PC				
Accuracy full scale:	±0.03 % RL				

All indicated data may be changed without notice. All the measures indicated are expressed in millimeters (mm
