

## Technical specifications

PWS15420250811

The PME electronic weighing platform is made of stainless steel top and has a small and medium capacity. Equipped with a single off-center load cell, it guarantees precise results even when the loads are not perfectly centered. Moreover, the PME single-cell weighing platform is the most widespread solution in many industrial and commercial applications as it is at the same time precise and robust. Additional options are available on request, including: platform calibration service with weight indicator, CE-M 3000e approval and indicator support column.

<b>Maximum supply voltage:</b>	15 Vdc
<b>Load plan:</b>	in stainless steel
