Technical specifications

PWS15320261107

The PMEI electronic weighing platform is made of stainless steel, has adjustable support feet, a level bubble and has a small and medium capacity. The PMEI platform is equipped with a single off-center load cell and guarantees precise results even with not perfectly centered loads. The PMEI single-cell weighing platform is the most widespread solution in many industrial and commercial applications as it is both precise and robust. Moreover, additional options are available on request, including: support column for indicator, platform service with weight indicator and CE-M 3000e type approval.

Degree of protection:	IP65
Maximum supply voltage:	15 Vdc
Load plan:	in stainless steel
