

## General information

PWS7420250728

The MC 355 touch weight transmitter works both as a weight indicator and as a multi-component batch batcher. It is able to manage two measuring channels with simultaneous acquisition, or alternatively, at reduced frequency and to display, during operation, the main status parameters. In addition, the MC 355 weight indicator has several options including the availability of various serial and analog outputs, as well as logic inputs and outputs and the possibility of interfacing with PC / PLC.
