The weight transmitter DAT 100 Analog has high performance and long-term reliability. Configuration and calibration can be set up from the front panel. The small width dimensions allow to place a large number of transmitters inside the electrical automation panels. The weight transmitter DAT 100 Analog has an interface with intrinsically safe barriers for use in hazardous areas. The product can be customized according to customer needs. It has two red status LEDs, 3 mechanical buttons behind the red door and screw terminal blocks.
