The weight transmitter DAT 200 Profibus guarantees high performance and long-term reliability. Configuration and calibration can be set up directly from the front panel. The weight transmitter DAT 200 Profibus can be connected directly to the Profibus DP fieldbus. The contained dimensions allow to place a large number of transmitters within the electrical panels automation. The DAT 200 Profibus product is interfaced with Intrinsically safe barriers for use in hazardous areas. It has two red status LEDs, 3 mechanical buttons behind the red door and screw terminal blocks.
