

Weight Transmitter DAT 400 PBS

available with certification • EAC • OIML

General information

The DAT 400 PBS weight transmitter is an innovative and exclusive product by Pavone Sistemi that can be customized. It owns the upload and download function for programming with TESTER 1008, 32 addressable units connectable to PC or PLC, linearization on 10 points and configuration and calibration from the front panel or PC via the USB serial port. It has a peak hold function for dynamic measures and screw terminal blocks.
