The weight transmitter E LINK 3000 Devicenet can be integrated into any industrial regulation and supervision system. This weight instrument has 5 different electronic configurations and 5 different enclosures for every installation requirement. The weight transmitter E LINK 3000 Devicenet can be configured from a PC, by using a dedicated software or directly from the Master via the communication protocol. Its main functions are: field and remote fault diagnostics, faulty cell emulation function with exclusion from the weighing system and automatic recalibration of the new load cell. The weight transmitter E LINK 3000 Devicenet owns two serial ports: COM1: RS232 for parameter configuration from pc and Devicenet. E LINK 3000 Devicenet has 5-pole removable terminals for electrical connection to load cells.
